LADYBOWER RESERVOIR

Ladybower Reservoir is a large 'Y' shaped reservoir, the lowest of the three in the Upper Derwent Valley. It was built between 1935 - 1943 and then it took a further two years to fill it.

The villages of Derwent and Ashopton had to be flooded to create this reservoir and the inhabitants were relocated to Yorkshire Bridge estate, just downstream of Ladybower Dam. It was opened in 24 September 1945 by King George VI.

This is an 8.5 mile walking route, adequate time should be allowed to ensure the route can be completed safely.

Please ensure you pre-plan your journey and walking route prior to departing and make sure to tell someone where you're going.

THINGS TO TAKE

Rain coat, good walking shoes, drink, some cash, camera or smart phone.

Refreshments are available from the Yorkshire Bridge Inn pub and picnic sites are situated throughout the walking route.

COMPETITION TIME...

Post a selfie from your trip using [#SHSUDayTrippers](#) for a chance to win **FREE GIAG Trip tickets.**

TRANSPORT

Ladybower Reservoir is a 40 minute bus ride from Sheffield City Centre. You can catch the 257 (33 mins) or X57 (40 mins) services from Sheffield Interchange.
